

HEALTHCARE CODING

Sponsorship Package

@hccodingofficial

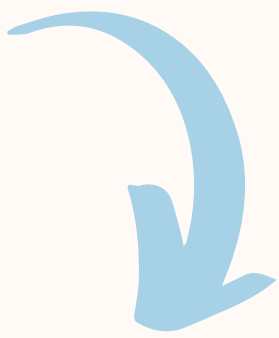

WHO ARE WE?

HealthCareCoding is a nonprofit aimed towards helping young, aspiring **Canadians achieve their programming and medical potential**. Run by highschoolers, HCCoding is a hackathon organization where students can create code designed to solve real world medical problems.

In 2022, Canada had less than 80 total in-person hackathons that had a specific practical focus – and **under 25% of that was targeted towards youth**. As a group of future doctors and programmers, we are disheartened to see the **lack of concept related hackathons**. Most groups in Canada focus on web development or game design instead of **solving practical medical issues** like identifying various diseases and helping track medicinal intake in a body.

We are one of the first in Canada to change this issue.

WHY CHOOSE US?

Sponsorships are critical to the wellbeing of hundreds of future programmers. By supporting our organization, you leave your impression on the hundreds of coders as well as support one of the first Hackathons dedicated to medicine in Canada. Hackathon attendees will leave with **everlasting innovation skills and knowledge** on problem solving for real world problems. They experience a memorable and fulfilling event full of **prizes, coding, and fun!** This is your chance to collaborate with proactive programmers and seek your targeted audience.

HOW YOU CAN HELP

- Donations towards the venue, food, prize fund, etc.
 - Become a guest speaker at our event
 - Bring products and merchandise of your company
 - Run a workshop and help educate aspiring scholars
 - Provide to the future of aspiring doctors, programmers, and innovators in Canada!
- 
-
